Sauna & Steam Bathing - Ways To Better Health

BENEFITS

• STEAM ROOM BENEFITS

Most people associate steam baths with relaxation or skin look-and-feel improvements, but steam room benefits may also include relief from muscle tension & stiff joints. It's a good way to unwind & relive stress. Boost the immune system. Blood circulation improvement. High moisture is good for respiratory problems. Effective for conditions such as asthma, bronchitis, allergies. Steam clears allergens and mucus from your lungs. It promotes deep & restful sleep. Steam Room's temperature is usually about 30°C to 40°C. So heavy sweating cleanses skin, Thoroughly as it opens pores allows deep dead cell to be flushed out.

• SAUNA ROOM BENEFITS

Sauna means a room in which water splashed on the hot rocks to produce steam. 15 - 20 min. of sauna is equivalent to one hour of exercise. It increases speed & intensity of our metabolism rate which helps in losing weight. Opens the pores on skin and help body to remove the toxins and other impurities from the body & blood. Help to losing cholesterol. People suffering from sleep disorders are benefited by inducing long relaxing. sleep warm steam helps blood flow resume effectively in all body parts & contracted muscles are relieved. Relieves joints pain. Sauna room uses dry steam and it has very low humidity so it promotes feeling of relaxation.
